

Woodhouse.

1654.

A New Almanack

And Prognostication for the
year of our Lord God
1654.

Being the second from the Bissextile or
Leap-year, and from the worlds
Creation, 5617.

Wherein is contained many things both
usefull, pleasant, and profitable for
all sorts of men.

Calculated for the Meridian of the famous City
of London, but will generally serve for
all Great Britain.

By John Woodhouse. Philomath.

LONDON

Printed by T.W. for the Com-
pany of STATIONERS.

1654.

The Common notes, and moveable Feasts
according to the English Account for
this year, 1653.

The golden Number.	2.
The Epact,	22.
The Cycle of the Sun,	11.
The Dominicall Letter,	A.
Shrove Sunday	5. February
Easter day	26. March:
Rogation Sunday	30. Aprill.
Ascension day	4. May.
Whitsunday.	14. May.

Note that the Roman Account is alwayes 10. dayes
before the English account, so that their 11. day is our
first day, and our last day is their 10. day.

The Exchequer openeth 8. dayes before any Term
begins, except the Term of Trinity, before which it
openeth but four dayes.

Observe that the first and last dayes of every Term
are the first and last dayes of Appearance.

The beginning and ending of the Terms, with
 their Return, and Effoyne dayes, dayes of Exception,
Retinna Brevium, and dayes of Appearance,
 for this year, 1654

Hillary Term begins January 24. ends February 13. and
 hath 4 returns.

Wood-house. 1654.

A
Prognostication, for the
yeare of our Lord God,

1654.

Being the second from the *Bissextile*, or Leap-year; and from the
Worlds Creation, 5617.

Wherein is contained a brief description
of the foure Quarters of the Yeare,
excellent Notes of Husbandry,
and Gardning, for every
moneth in the yeare.

With the names of all the Principall
Tayres in *England* and *Wales*.

BY

JOHN WOOD-HOUSE,
Philomath.

LONDON,

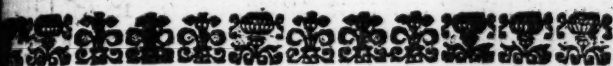

Printed by E. P. for the Companie
of Stationers. 1654.

Wood-house. 1654.

A most plaine and easie Table, shewing the true time of the beginning, continuance, and yeares, since the Reign of each King & Queen in England, from the Conquest, untill this yeare 1654. Gathered forth of Chronicles, and set forth for profitable use of Lawyers, Scriveners, &c.

Since the States Government began, 5 yeares, 30

A generall Description of the foure
parts of the Yeare; and first, of
the *Spring*.

THE *Spring* beginneth with the Sunnes
ingresse into the first minute of the Equi-
noctiall Signe *Aries*, which hapneth with
us upon Friday, the 10. of *March*, 48. minutes
past 11. at night, and continueth the Sunnes
cursion through *Aries*, *Taurus*, and *Gemini*, and
manifesteth equall day and night to the inhabitants
of the whole Earth. Now he taketh his leave of
the Southerne, and beginneth to send forth his
comfortable influence to the Northerne part of
the world.

The generall qualitie of this Quarter, is hot
and moist, temperately, constant in neither,
being sometimes moist, now hot, by and by
cold; yet heat encreaseth, as the Sunne elevateth
to the Verticall point.

Astrologers have divided this Quarter into
three parts, each containing a moneth, and have
found by experience, that the first moneth is
more moist then hot, and therefore have ascri-
bed it to *Aries*, or the Ramme, being of a tem-
perate heat, fit for germination, agreeable to this

Wood-house. 1654.

season : And for this cause, *Aries* is said to be of disposition more moist then hot. The second moneth is moist, and hot, and is ascribed to *Taurus*, or the Bull : Now the Sunnes heat is augmented, and doth assimilate the nature of the Bull, *Eo quod Taurus sit animal fortius arietis*. The third moneth is more hot then moist, and therefore is ascribed to *Gemini* or the Twinnes, because his heat, in respect of the beginning of the Quarter, is encreased two-fold.

Of Summer.

THis Quarter beginneth with the Sunnes entrance into the first scruple of the Tropicke Signe *Cancer*, being this yeare upon Sunday the eleventh day of *June*, nine min. past eleven at night, and continueth the Sunnes itinera- tion through *Cancer*, *Leo*, and *Virgo*. At this time the Sunne maketh his nearest approach to our Zenith, having the greatest North declina- tion from the Equinoctiall, thereby causing the longest day and shortest night, in the Northern Hemisphere. About this time the Sunne is in his *Apogee*, or point farthest distance from the Earth.

The naturall disposition of this Quarter, is hot and drie ; yet in the first moneth of this Quarter, heat is more predominate then drouth, and therefore hath his appellation from *Cancer*, or the Crab. The second moneth of this Quarter

Wood-house. 1654.

is of nature hot, and drie, and therefore is
cribed to *Leo*, or the Lyon. The Sunne now
clineth apace, yet his heat seemeth to be more
vorous then in the precedent moneth: The
ason (as some thinke) is, becaufe about the
iddle of this moneth the Dog-star riseth with
the Sunne, and co-operateth with the Sunne,
producing such scorching heat, as commonly
endeth this moneth. The third moneth of
his Quarter is more drie then hot, and is
tributed to *Virgo*, or the Virgin.

Of *Autumne*.

His Quarter beginneth with us on Wednes-
day the 13 of *September*, 54 min. past 11 in
fore-noon; at what time the Sunne passeth
into the first scruple of the second Equinoctiall
igne *Libra*, thereby co-equating the dayes and
nights throughout the whole World, being
once more bifrontall, and equally radiating to
the Artick and Antartick Poles; and continu-
ing his perambulation through *Libra*, *Scorpio*,
and *Sagittarius*. The first moneth of this Quar-
ter is cold, and drie, yet something inclining to
heat; it is ascribed to *Libra*, or the Ballance:
because it doth equall dayes and nights. The
second moneth doth equally incline to cold, and
moist, producing a distempered and pestilent
air, and therefore it is fitly ascribed to *Scorpio*,
the Scorpion, because of the venomous nature

Wood-house: 1654.

of that Creature. The third moneth is mo
moist then drie, and is ascribed to *Sagittarius*, o
the Dart, because Frosts and Snowes, as Dart
doe hurt the vegetable and living Creatures.

Of winter.

THis Quarter takes beginning at the Sun
ingresse into the first scruple of the ima
narie Signe *Capricorne*; which happeneth
yeare on Tuesday, the Twelfth day of Decem
ber, 38. minutes past seven in the morning; a
continueth the Sunnes progresse, through *Capri
cornus*, *Aquarius*, and *Pisces*; being now in
greatest distance from our Zenith, and obliqu
from the Equinoctiall, causing the shortest
and longest night, to the Northern Hemispher

The naturall qualitie of this season, is col
and moist: yet in the first moneth of this Qu
ter moisture is subordinate to cold, and there
fore is ascribed to *Capricornus*, or the Goat, bein
of a cold, drie, and melancholy nature, of affec
tie to this season. The second moneth is equall
cold and moist, and therefore is ascribed to
Aquarius, or he that poureth out water, becau
of the abundance of Raine which usually falle
in this moneth. The last moneth, is of disposi
tion more moist then cold, and therefore
ascribed to *Pisces*, or the Fishes, which is a water
Creature, because Raine doth much abound,
Snow and Ice are much turned into water
moneth.

Of the Eclipses happening this
Yeare, 1654.

Here will be foure Eclipses, two of the Sun, and two of the Moone, three of which will be visible in our Horizon. The first is of the Sun, upon the 7 of February, about 6 of the clock in the morning, above an houre before Sun-rising, therefore not visible to us in *England*.

The second is of the Moon, on Wednesday the 21 of February: A great part of this Eclipse will be visible to us in *England*, (if the Skye be cleare) but the Moon will set in the West, before the end thereof. The beginning will be at 5 a clock in the morning. The middle at 6. and 12 min. The end at 7. and 24 minutes. A third part of the Moones body will be darkned.

The third is a very great Eclipse of the Sun, on Wednesday the 2 of August, in the fore-noon. The Sun will be 10 digits darkned, that is, 10 parts of 12. And that little light that remaines, will be upon the South side of the Moones body. The beginning will be at 7. 44 min. in the morning. The

Wood-house. 1654

middle, or greatest darknesse, at 8.56 min.
The end at 10. 8 minutes.

This will be a great and terrible Eclipse
And we may expect great mutations in
Kingdomes & Common-wealths to ensue
thereupon: For such great Eclipses as these
have in all Ages bin attended with some
notable events and sequels.

The fourth, is a small Eclipse of the
Moone, on Thursday the 17 of *August*, in
the evening. This also will be visible in our
Horizon, if the clouds hinder not. The be-
ginning will be at 9.45 min. at night. The
middle at 10.30 min. The end at 11. 10
min. There will be almost three parts of
twelve darkned.

The Eclipse of the Sun, is occasioned by
the interposition of the dark body of the
Moon, betwixt the Sun and our sight; and
this never happeneth, but when the Sun and
Moon are in a visible conjunction.

The Eclipse of the Moon, is occasioned
by the interposition of the opacous sha-
dow and dark body of the Earth, betwixt
the Moon & our sight: and this can never
happen, but at the full Moon.

Excellent Notes of Husbandry and Gardning, for every Moneth in the Yeare.

January.

In January cut downe Timber (and it shall not chink nor be eaten with worms;) in the last quarter of the Moone set oʒ some Kernels, and Berries of Bay-trees, Pybets and Box. Set Quick-sets, Rose-trees, Berranthes, Filberds and Plum-trees; and remove trees if the frost be not too hard, prune, and Lop them before full Moone: some oʒ set Beanes and Pease, and dung land in the last quarter: geld Cattell to Reare: fallow Land foʒ Wheat & Rye: Trench Gardens with dung: and remove Bees: and foʒ your owne health, (keep your body warm) let good and wholesome dyet be your Physician, moderate exercise and labour your salve to cause appetite.

February.

Now some all sorts of Pease and Beanes, and other Pulse: some Mustard-seed: cast up Ditches: set and plant Vines, Hops, Goose-berries, and any fruit that growes upon bushes: prune and trim all sorts of fruit-trees from Mistle, Canker, and all superfluous branches. Graze in the latter end of the moneth, some Onyons in cold stiffe land: Take heed of cold, foʒ beate flagmatick meats.

March.

Wood-house. 1634.

March.

In the newe of the Moone (the wind any but South
or West) Graft Pearre, Marrow, or Apple-trees,
make an end of sowing all manner of Pulse, and be-
gin to sow Dates, Barley, Parsenips, Onions,
Carrets, Cucumbers, Melon, and all kind of Pot-
heerbs: slip Hartichokes, and Sage: Geld Lambs,
Let blood according to strength and necessity, the sign
and weather also being fit (but take advice of the
learned Physitian) looke what disease cannot be cu-
red in the Spring time by Physick, will hardly be cu-
red all the yeare after.

April.

Sow Barley, Hemp and Flax: Pole Hops: set and
sow all kind of Garden heerbs: Open Hives, and
let Bees labour for their living: Let Tanners now
provide them for Barke, and all good Housewives looke
to their Dairies: bleed and purge with advice: those
that are troubled with Aches, or the Gout, let them
goe to the Baths in this or either of the moneths.

May.

Sow Barly on all light-lands and bearing grounds,
and likewise Hemp and Flax, and all manner of fine
seeds and heerbs: take Lambs from their Dams: sow
land for Wheat and Rye: leave lopping of Trees:
teach Hops to climb, but cut off the superfluous bran-
ches: Rise early, walke the fields, especially by run-
ning streames: Sage and Sweet Butter is now an ex-
cellent break-fast, Sage and clarified Whay; as also,
Scurbie-grasse-Me, and Worme-wood-Becte, are
wholesome drinks to be drunk fasting.

June.

Sheare Sheepe, bring home fuell, weed Cozne and
Gardens, set Rosemary, Carnations, and Gillies
flowers: sow Lettuce and Radish seed three or foure
dayes

Wood-house. 1654.

aped after the fall, for then they will not run to seed :
make Hay, carry Sand, Lime, Marle, and Manure,
of what kind soever besittng your Land : cut neither
Hedge nor Tree in this, and the two next moneths :
 beware of great thirst : use thin and light dyet, moder-
ate exercise, and chaste thoughts.

July.

Apply making and getting in of Hay : Pull Hempe
that is ripe, gather Garden-Beanes, Get Rue,
and Cloze-wood, and Gaule, to strow on your swardes,
to destroy Moths and Fleas. Fence your Coples, use
moderate dyet : take heed of great thirst, for nothing
bringeth the Pestilence, or pestilent Diseases, sooner
then extreme thirst and serbent heats, and cold taken
also suddenly upon them : Take no Physick, bleed
not but upon all violent occasions.

Labour in Summer, take paines with the Ayr,
Else in the Winter live poore and in want.

August.

Follow close your Corne-Harvest : some Winter
herbs in the new of the Moone : gather Garden-
seeds : some Barley and Oats : gather your Sum-
mer fruits : refrain from sleeping in the day time af-
ter meat : abyrd riot and excelle.

September.

At the beginning of this month, & end of the former,
gather Hops when they wax brown, the weather be-
ing faire, and no dew on the ground : Kill Bees : make
Merjuice : some Wheat and Rye : remove and set all
Slips of flowers, betweene the two Lady dayes :
put Swine to Mast : remove Trees every new
Moone, from September untill February, especially in
the new of the Moone, the weather faire and warme,
the wind South or West : use Physick moderately :
beare fruits too pleasant or rotten : Gun ryot and
excelle of dyet.

October.

October.

Some Wheat and Rye, the sooner the better, for fear of raine : set Acorns and Nuts, gather Winter fruit, the weather dry, in the afternoon, and in the wane of the Moone. Cut Rose-trees, if you desire to have store of Roses, doe this once in two yeares : refuse not any needfull physick at the hands of the learned : and use all moderate sports, to revive the vitall spirits to the service of God onely.

November.

Make Mault; kill Hogs; trench Gardens with dung; set Crab-tree stocks; sowe Wheat and Rye in exceeding hot sandie grounds; cut downe Timber for Ploughs, Carts, and other implements for Husbandry : use wholsome meat and drinke, with good exercise to preserve health.

December.

In this and the next moneth, cut downe Timber in the last quarter of the Moone; uncover the roots of fruit-trees; set Beanes and Pease; cover all your best flowers and hearbs from frosts and hoazes, with old rotten horse-dung; Looke well to your Cattell; water and keepe moyst your medowes; let horses blood : And to conclude, drinke good Wine and strong drinke, keepe thy body warme clad, thy house warm and dry; banish all cares from thy heart, and feast thy poore neighbours, rejoycing, that God sent his onely begotten Son, about this time, into the world, to save all such that lay hold on him with a true and lively faith.

Neque is qui plantat, neque is qui rigat,
Sed Deus qui dat Incrementum.

Wood-house. 1634.

FAYRES.

The names of the Principal Fayres in *England* and *Wales*, together set forth; with the Moneth, Day, and Place where they be kept, more largely then heretofore.

Fayres in January.

The third day at Llanibithir. Fifth day at Hicketford, in Lancashire. The vi day, being Twelfth-day, at Salisbury, at Bristow. The vii day at Llanginnic. The xxv day at Bristoll, Churching-ford, at Gravesend. The xxxi day at Llandysfell.

Fayres in February.

The first day at Bromley in Lancashire. The ii day at Bath, at Bicklesworth, at Bugworth, at Faringdon, at Codlemew, at Linne, at Maidstone, at Reading, at Becklesfield, at the Vizes in Wiltshire, at Whitsland. The iii at Boxgrove, at Brimley. The vi at Stafford, for six dayes, for all kind of Merchandize, without Arrests. The viii day at Tragaron. The ix day at Llandaffe. The xiiii at Owndle in Northamptonshire, Feversham. The xxiiii at Baldec, Bourn, From, Henly upon Thames, Higham-ferries, Tewksbury, Uppingham, Walden. The xvi at Stanford, an Horfe-Fayre.

Fayres in March.

The first day at Langadog, at Llangvallah, at Madrim. The ii day at Bremwel-braks in Norfolk. The iv day at Bedford, at Oakham. The viii day at Tragaron. The xii at Spaford, at Stamford, at Sudbury, at Weoburne, at Wrexham, at Bodnam and Alsome in Norfolk. The xiii day at Wye, at Bodwin in Cornewall, at Mountbowin. The xvii day at Patrington. The xviii at Sturbridge. The xx at Alesbury, at Durham. The xxiv at Llaperchemith. The xxv at St. Albones, at Ashwell in Hertfordshire, at Barton, at Cardigan, at Cartwalden in Essex, at Huntington, at Saint Jones in Werc. at Malden, at Malpas, at Newcastle, at Northampton, at Onay in Bucking. at Woodstock, at Whireland, at great Chart. The xxx at Malnesbury.

Fayres

Wood-house. 1654.

Payres in April.

THe ii day at Hitchin, Northfleet, at Rochford. The iii day at Lecke in Staffordshire. The v day at Wallingford. The vii day at Darby. The ix day at Billingsworth. The xxii at Stabford.
